Summary

B.Tech CSE student (2027) and aspiring DevSecOps engineer. UP Police cyber security intern who builds Python/Linux security tools and CI pipelines (Gitleaks, Bandit, Trivy). Completed AWS Cloud Practitioner track (DataCamp). Seeking an open roles or placements.

Education

Teerthanker Mahaveer University — Moradabad, Uttar Pradesh
B.Tech, Computer Science and Engineering — *Aug 2023 – Expected Jun 2027*
- Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Certifications

AWS Cloud Practitioner track (DataCamp) | CompTIA Security+ (in progress) | Cyber Security Program, UP Police (APCSIP-2026) | GitHub Actions (GitHub) | Introduction to Generative AI (Google Cloud)

Technical Skills

Security & DevSecOps: Gitleaks, Bandit, Trivy, GitHub Actions CI/CD, pre-commit hooks, iptables/Netfilter, log analysis, SIEM JSON
Cloud & Containers: AWS (EC2, S3, IAM), Docker, Kubernetes (fundamentals)
Systems: Linux (Ubuntu/Debian), systemd, Bash, Git
Languages & Web: Python, JavaScript, SQL, C/C++, Node.js, Express, React, WebSockets, PostgreSQL

Experience

Cyber Security Intern — Jun 2026 – Jul 2026
UP Police, Amroha Cyber Security Program (APCSIP) — *Amroha, UP*
- Audited Linux server auth logs (`/var/log/auth.log`) to detect brute-force and reconnaissance patterns.
- Wrote Python and Bash scripts to harden servers and isolate suspicious hosts, based on the findings.
- Analyzed cybercrime mechanisms, incident traces and forensic workflows under supervision; assisted with incident response.

Full-Stack Developer — Jan 2024 – Present
Haque And Sons — *Remote*
- Built and deployed 3 web apps (CollabSheets, ProResume-Builder, Nestfy) with authentication, using React, Node.js, Express and PostgreSQL.
- Built real-time multi-user editing over WebSockets and designed PostgreSQL schemas, migrations and indexes.

Security Projects

Irus AI | *Flask, PostgreSQL, Docker, GitHub Actions* — GitHub
- Built a full-stack AI assistant (chat, web search, documents, image generation, memory, voice); containerized with Docker and deployed on Render.
- Added a CI pipeline that runs Gitleaks, Bandit, Trivy and Pytest before every deployment.

Sentinel Daemon | *Python, systemd, iptables* — GitHub
- Built a systemd daemon that tails `auth.log`, correlates failed logins in a rolling window and inserts iptables DROP rules.
- Blocked 14 IPs during testing with under 2 ms detection-to-block latency and 0 false positives.

GitShield | *Python, regex, Git hooks* — GitHub
- Built a native pre-commit hook that blocks AWS keys, PEM private keys, high-entropy tokens (Shannon entropy) and `chmod 777` before commit.
- Zero external dependencies.

Threat Intelligence Log Parser | *Python, urllib, JSON* — GitHub
- Detects SQLi, XSS and path-traversal patterns in access logs and exports SIEM-ready JSON.
- Matched hosts against 118,800+ threat indicators in 1.86 s.

Leadership & Honors

Team Lead, UIDAI Data Hackathon: led a 4-member team analyzing demographic data trends and building pipeline models.
Aspire Leaders Program: selected for the global cohort (Aspire Institute).
Viksit Bharat Young Leaders Dialogue (VBYLD 2027): essay round qualifier.
