Summary

B.Tech CSE undergraduate (2027) and DevSecOps/SRE practitioner with hands-on experience as a UP Police Cyber Security Intern building Python/Linux defense automation, pre-commit security hooks, and multi-stage CI/CD pipelines (Gitleaks, Bandit, Trivy, pip-audit, Pytest). Completed AWS Cloud Practitioner track (DataCamp). Seeking DevOps, SRE, or DevSecOps roles (2027 Batch).

Education

Teerthanker Mahaveer University — Moradabad, Uttar Pradesh
B.Tech in Computer Science and Engineering — *Aug 2023 – Expected Jun 2027*

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems (DBMS), Computer Networks

Technical Skills

DevSecOps & CI/CD: Gitleaks, Bandit (SAST), Trivy (Container Scan), pip-audit (SCA), GitHub Actions, Pre-Commit Hooks, Pytest

Cloud & Orchestration: AWS (EC2, S3, IAM, VPC), Docker, Kubernetes (Deployments, StatefulSets, ConfigMaps, Secrets, PVCs)

Systems & Security: Linux (Ubuntu/Debian), systemd, iptables/Netfilter, Bash, Auth Log Forensics, SIEM JSON, Git

Languages & Databases: Python, SQL, C/C++, JavaScript, Node.js, Express, React, Flask, PostgreSQL

Experience

Cyber Security Intern — Jun 2026 – Jul 2026
UP Police – Amroha Cyber Security Program (APCSIP-2026) — *Amroha, Uttar Pradesh*

- Audited Linux server authentication logs (`/var/log/auth.log`) to identify SSH brute-force and network reconnaissance patterns.
- Developed Python and Bash automation scripts to harden server configurations and isolate malicious IPs via firewall rules.
- Analyzed cybercrime attack traces and digital forensic workflows under supervision to assist with incident triage.

Full-Stack Developer — Jan 2024 – Present
Haque & Sons — *Remote*

- Engineered and deployed 3 production web platforms (*CollabSheets*, *ProResume-Builder*, *Nestfy*) using React, Node.js, Express, WebSockets, and PostgreSQL with role-based authentication and indexed database schemas.

DevSecOps & SRE Projects

Irus AI | *Flask, PostgreSQL, Docker, GitHub Actions, Trivy, Bandit, Gitleaks* — GitHub | Live

- Containerized a multimodal AI assistant with Docker and automated a 4-stage DevSecOps CI/CD pipeline enforcing Gitleaks secret scanning, Bandit SAST, pip-audit SCA (remediating 40+ CVEs), Trivy container scanning, and Pytest before Render deployment.

Sentinel Daemon | *Python, systemd, iptables, Linux* — GitHub

- Engineered an automated Linux `systemd` security daemon tailing `/var/log/auth.log` in a rolling window to dynamically inject `iptables DROP` rules, blocking 14 attacking IPs with under 2 ms detection-to-block latency and zero false positives.

GitShield | *Python, Regex, Shannon Entropy, Git Hooks* — GitHub

- Built a zero-dependency Git `pre-commit` hook inspecting staged diffs via regex signatures and Shannon entropy ($H \geq 4.5$) to block AWS keys, PEM private keys, high-entropy tokens, and unsafe world-writable permissions (`chmod 777`) pre-commit.

Infra-Monitor | *Python, GitHub Actions Cron, urllib, JSON* — GitHub

- Created a zero-dependency SRE health monitor measuring HTTP endpoint latency (`perf_counter`), disk thresholds, and SSH brute-force counts on a 6-hour GitHub Actions schedule, exporting SIEM-ready JSON reports with POSIX exit codes.

Threat Intelligence Log Parser | *Python, Regex, urllib, JSON* — GitHub

- Built a web access log analyzer detecting SQLi, XSS, and path-traversal payloads while cross-referencing source IPs against 118,800+ threat indicators in 1.86 s and exporting normalized SIEM JSON.

Certifications & Honors

- **Certifications:** UP Police Cyber Security Program (APCSIP-2026) | AWS Cloud Practitioner Track (DataCamp) | GitHub Actions (GitHub) | Introduction to Generative AI (Google Cloud) | CompTIA Security+ (In Progress)
- **Honors & Leadership:** Team Lead, UIDAI Data Hackathon (4-member demographic modeling pipeline) | Aspire Leaders Program Global Cohort (Aspire Institute) | Viksit Bharat Young Leaders Dialogue (VBYLD 2027) Essay Round Qualifier
